

## **Terms of reference for Watershed Committee**

The watershed committee consists of five members of the Sheet Harbour and area Chamber of Commerce, Warren Parsons, Jack Marshall, Robert Moser, Shelia Martin and George Child. Over the past several months the committee has met a number of times in an effort to define the role of this committee. The following is the result of our meetings and consultation.

1. The committee will be a source of information on water issues for the Chamber. This will include the water quality in the various rivers and bays within the Chambers jurisdiction.
2. The committee will be the representative for the Chamber regarding water concerns. This could involve attending meetings, investigating concerns and watching for trends on behalf of the Chamber. The committee will be responsible to the Chamber and report to the Chamber on a regular basis.
3. The committee will have an educational role for the Chamber and the public. The committee will provide or find answers to the questions people have about water. (Example: How to get a well tested?)
4. The committee will endeavor to collect any reports or studies on water quality and water issues within the Chambers jurisdiction.
